Project Details

Q 3. Please provide an outline of your project (250 words)

Presenting opportunities for children with autism helps to develop their social skills to allow them to engage more with their local community. Equally, their families, who often feel isolated are able to meet others for mutual support, developing social and support networks as they themselves grow more confident to engage with the local community and economy. This program has been running for a few years in the St.George area and has proven the most popular activity we provide to these kids. For each session, the Facilitator chooses a meal recipe plus a simple dessert for the group to prepare. The group of 10 children work together to create their meals and then enjoy having their dinner together. As the group is so popular we give priority to those who missed out the previous session, but there is always a waiting list. As we recently started providing support in the Hawkesbury region, we are keen to introduce groups for children which will enhance their life skills as well as provide fun social opportunities. We expect the network of support to grow fast in the area.
